

# HOW TO BUY \$15K BTC IN 2 DAYS WITH A BANK LOG PART 2.

## INTRODUCTION

So in the Part 1, we talked about how to log into the Coinzoom btc account and how to find the Direct deposit information (Account Number & Routing Number).

With that done, the next step is to add the info to your hacked bank login (which you have already bought from shop) as the payee.

### 13. Click on Direct Deposit.

The screenshot shows a mobile app interface for adding a new person. At the top, there is a back arrow and the title 'Add a person'. Below this is a question: 'Which payment method would you like to use?'. There are three options listed, each with an icon, a title, a description, and a right arrow:

- Direct deposit** (downward arrow icon): Payments are electronically deposited into your payee's account. A large green arrow points to this option.
- Email** (envelope icon): Your payee will receive an email to accept payments.
- Check** (envelope icon): Sent by mail to the payee's address.

22. Money reflect after Exactly 2 Days. Direct deposit is always a 2 days' reflection job.

Now someone will ask...

Money Maker how can I withdraw my Money after I have loaded the USD wallet on Coinzoom??

VERY SIMPLE 😊 .

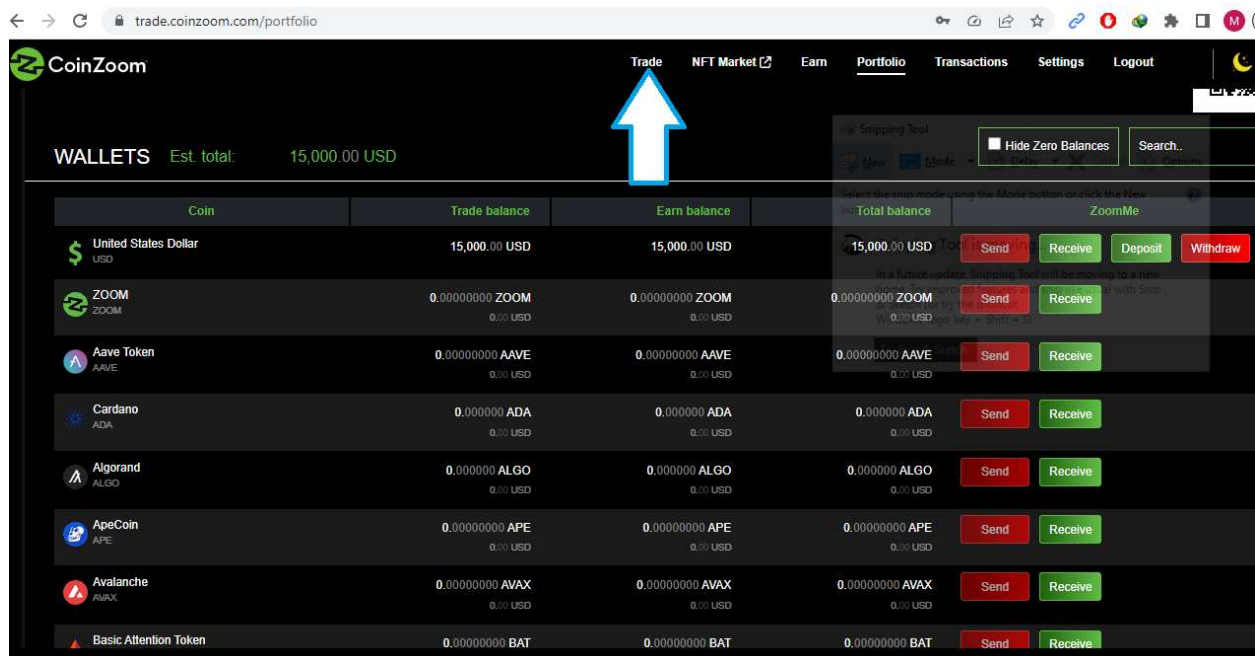

JUST READ BELOW...

## HOW TO BUY \$15K BTC IN 2 DAYS WITH A BANK LOG PART 2.

### HOW CAN I WITHDRAW MY MONEY MYSELF AFTER LOADING INTO COINZOOM

It is common these days for clients or middlemen to run with your money after it loaded, so when I load the coinzoom, these are the 3 ways I cashout my money.

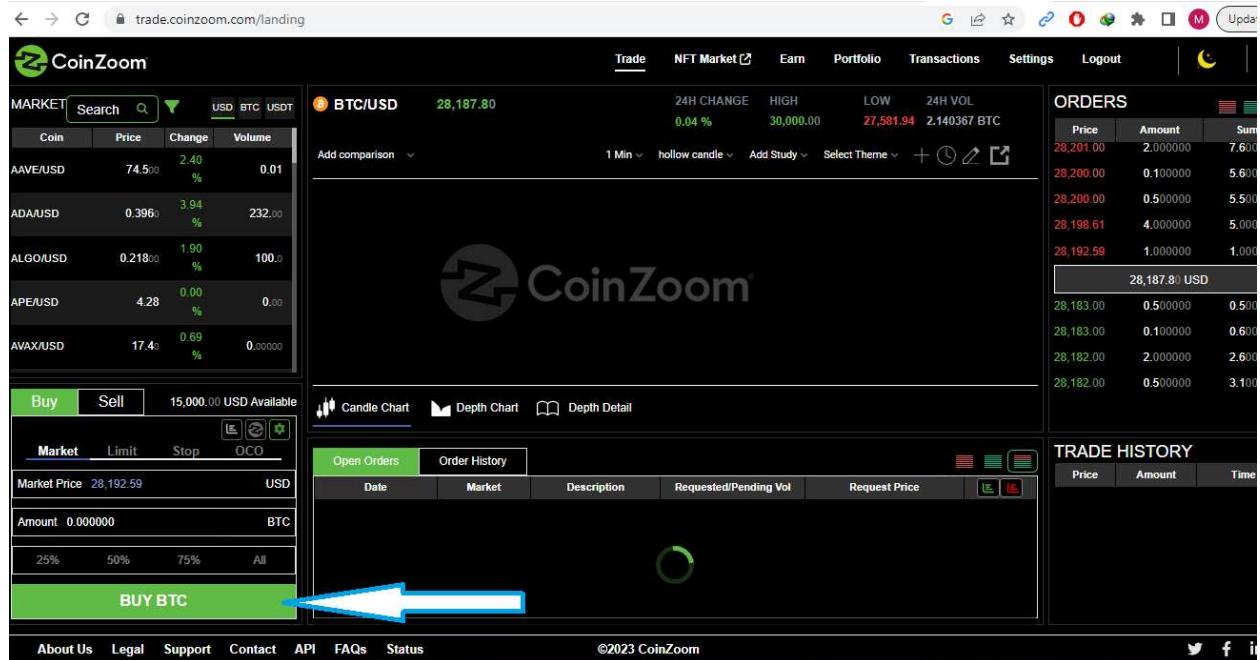

#### a. CONVERT THE USD MONEY INTO BTC THEN TRANSFER YOUR BTC OUT

Click on TRADE.

## HOW TO BUY \$15K BTC IN 2 DAYS WITH A BANK LOG PART 2.

- Click on “BUY BTC”, you can choose any amount of btc to buy, after that transfer your btc into your coinbase or trust or blockchain wallet.

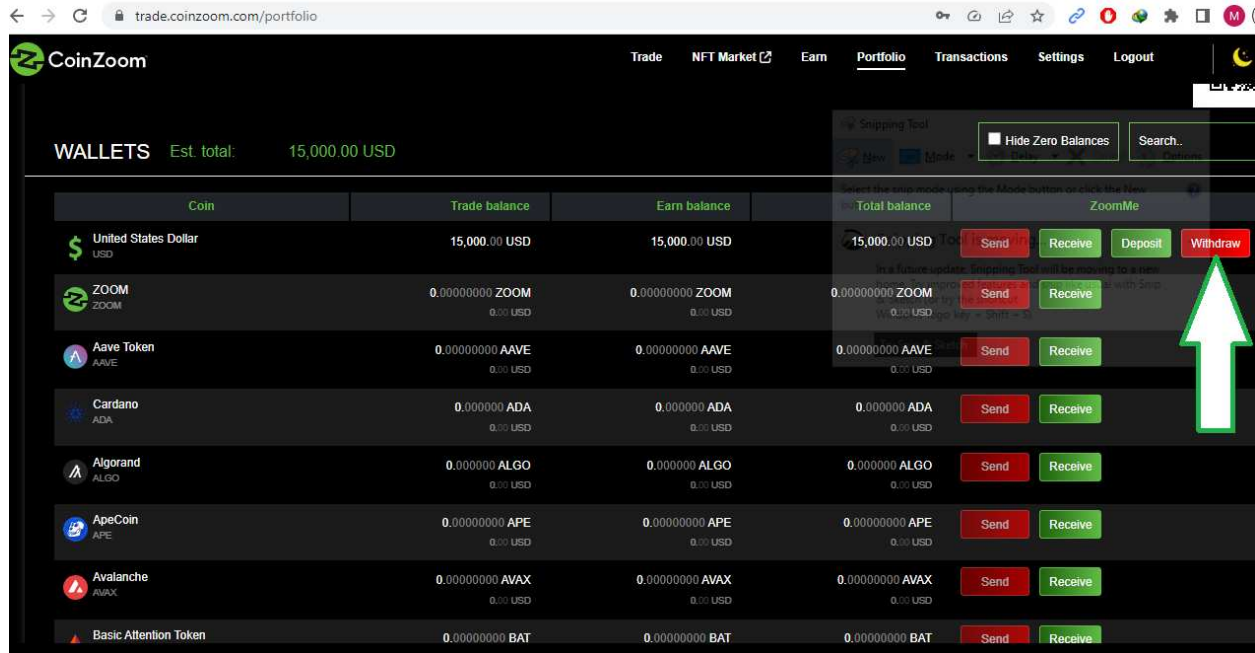

If you don't want btc and you want cash too, you can use the method below;

## b. WIRE WITHDRAWAL METHOD

➤ Click on “WITHDRAW”

# HOW TO BUY \$15K BTC IN 2 DAYS WITH A BANK LOG PART 2.

➤ Click on Wire Withdraw.

The screenshot shows the CoinZoom website's withdrawal interface. The header includes the CoinZoom logo and navigation links: Trade, NFT Market, Earn, Portfolio, Transactions, Settings, and Logout. The main heading is "< WITHDRAW". Below this, the available balance is \$15,000.00 and the total balance is \$15,000.00. Two withdrawal options are presented: "CoinZoom Instant Debit Card Withdraw" and "Wire Withdraw", which is highlighted in green. Below the options, there are two lines of small text: "\* Funds can only be sent to registered account holder (a fee of \$25 will be charged)." and "\* The minimum wire withdrawal is \$100." The form contains three fields: "Bank Account" (a dropdown menu with an "Add bank account" link below it), "Amount to Withdraw" (a text input field), and "Fee Deduction" (a dropdown menu). A "Reference text" label is positioned above a large text input field. A green "Submit" button is located at the bottom of the form. The footer contains links for About Us, Legal, Support, Contact, API, FAQs, and Status, along with the copyright notice "©2023 CoinZoom" and social media icons for Twitter and Facebook.

Now with this, the money will be sent out via Wire transfer into your bank account. But the trick here is that, if the name on the coinzoom is John Newman, you have to write John Newman as the name on the bank too.

Make sure the name you put on the receiving bank is the same as the name on the coinzoom, even if it a different owner.

Me personally I prefer converting my USD to btc since everyone loves btc, others too love wiring the
